UniBlade Lantern

UniBlade Lantern

The UniBlade is our new design for hall lanterns. The design is clean and modern, with a range of colour options for the body such as natural, black and white.

The UniBlade lantern is ideal for use in a lift lobby where there are three or more cars and it is not always easy to see which lift has arrived. The UniBlade stands out at right angles to the wall and when illuminated, clearly identifies the lift that has arrived.

The side panels of the UniBlade Hall Lantern are available in black or white, with a range of illumination colours.

The unit's design looks 'custom' but this is a standard production unit that offers excellent value for money.

Key features

- Smart, modern appearance
- Side panel colour available in black or white, others colours on request
- Easy installation, with or without faceplate
- Meets DDA requirements
- Wide range of colour options
- Gong optional
