

US95 waterproof pushbutton

Suitable for outdoor use

Same classic design

Designed & tested to last

Key features

- IPx5 - waterproof and dust resistant.
- Extensive range of pressel legends to choose from with bespoke designs available on request.
- Legends are 15mm high and tactile with braille.
- Legend and halo illumination.
- Vandal resistant - meets EN81-71.

The circular shaped US95 waterproof pushbutton is the same classic design as our standard US95, with added features to make it the ideal choice for outdoor use.

This variation of our most popular US95 is waterproof and dust resistant, whilst also meeting all the requirements of the visually impaired. It is made up of four elements: switch body, illumination, pressel, and surround.

The character or symbol, known as the legend, provides clear identification. The legend and the halo (light created between the pressel and the surround) can be illuminated in a wide variety of colours.
